Journal of Wind Engineering and Industrial Aerodynamics

Contents Volume 38 (1991)

Vol. 38 No. 1: Special Issue on Vehicle Aerodynamics

Preface vii

Wind tunnel tests on the influence of fixed ground board length on the aerodynamic characteristics of simple commercial vehicle models
K.P. Garry (Bedford, U.K.) 1
Determination of dynamic pressure and reference pressure in automobile wind tunnels with open test section
P. Müllenbach and K.-R. Deutenbach (Munich, Germany) 11
Wind tunnel tests to obtain train aerodynamic drag coefficients: Reynolds number and ground simulation effects
C.J. Baker and N.J. Brockie (Nottingham, U.K.) 23
Influence of boundary layer control systems on the flow field around passenger cars
P. Müllenbach and K.-R. Deutenbach (Munich, Germany) 29
The effect of ground simulation on the flow around vehicles in wind tunnel testing
B. Fago (Hamburg, Germany), H. Lindner (Hannover, Germany) and O. Mahrenholtz (Hamburg, Germany) 47
Testing of road vehicles under cross wind conditions
C. Kramer, R. Grundmann and H.J. Gerhardt (Aachen, Germany) 59
The wind tunnel simulation of wind turbulence for surface vehicle testing
K.R. Cooper (Ottawa, Canada) 71
Moving surface boundary-layer control as applied to two-dimensional and three-dimensional bluff bodies
V.J. Modi, M.S.U. Fernando and T. Yokomizo (Vancouver, Canada) 83

Vol. 38 Nos. 2–3: Special Issue on Building Aerodynamics

Preface iii

Statistical analysis of the sea-land breeze and its effect on the air temperature in summer
H. Kitayama, T. Katayama and T. Hayashi (Kasuga, Japan), J. Tsutsumi (Chikushigaoka, Japan) and A. Ishii (Shiobaru, Japan) 93
Wind data generator: A knowledge-based expert system
E.D.H. Cheng (Honolulu, HI, USA) 101
Wind tunnel simulation of the flow around two-dimensional hills
A.D. Ferreira, M.C.G. Silva, D.X. Viegas and A.G. Lopes (Coimbra, Portugal) 109
The influence of upwind topography on the development of the boundary layer profile over a city centre
A.M. Goliger and R.V. Milford (Pretoria, South Africa) 123
Wind climate in city centres: Pedestrian comfort versus accumulation of pollutants
H.J. Gerhardt and C. Kramer (Aachen, Germany) 131

0167-6105/91/$03.50 © 1991 Elsevier Science Publishers B.V. All rights reserved.

Numerical simulation of wind in a built-up environment and experimental verification
M. Bottema, J.G.M. Eggels and J.A. Wisse (Eindhoven, The Netherlands) 141
Wind tunnel simulation of the surface layer flow for the prediction of wind loads on low-rise structures
H.W. Tieleman (Blacksburg, VA, USA) 151
Design considerations for buildings in a sandy and dusty environment
K.K. Bofah, C. Kramer and H.J. Gerhardt (Aachen, Germany) 161
Measurement of velocity near and pressure on a cylindrical tower located on irregular terrain
J. Maier-Erbacher and E.J. Plate (Karlsruhe, Germany) 167
Full-scale measurement of wind pressures and response accelerations of a high-rise building
T. Ohkuma and H. Marukawa (Yokohama, Japan), Y. Niihori and N. Kato (Kawazaki, Japan) 185
Effect of damping of interference-induced oscillations of two identical circular cylinders
M.M. Zdravkovich and E.B. Medeiros (Salford, UK) 197
Frequency-dependent wind load coefficients of rectangular cylinders
P.H.W. Prenninger (Kyoto, Japan) 213
Field measurements of pressures on the Texas Tech Building
M.L. Levitan, K.C. Mehta and W.P. Vann (Lubbock, TX, USA) and J.D. Hilmes (Highett, Vic., Australia) 227
Pressure measurements on the Texas Tech Building: Wind tunnel measurements and comparisons with full scale
D. Surry (London, Ont., Canada) 235
Comparisons of wind-tunnel and full-scale surface pressure measurements on low-rise pitched-roof buildings
G.M. Richardson (Bedford, UK) and D. Surry (London, Ont., Canada) 249
The magnitude and distribution of wind-induced pressure on hip and gable roofs
D. Meecham (London, UK), D. Surry and A.G. Davenport (London, Ont., Canada) 257
Wind pressure on roofs of various geometries
T. Stathopoulos and P. Saathoff (Montreal, Que., Canada) 273
Wind pressures on roofs of very low and very large industrial buildings
C. Kramer and H.J. Gerhardt (Aachen, Germany) 285
Variability of low building wind loads due to surroundings
T.C.E. Ho, D. Surry and A.G. Davenport (London, Ont., Canada) 297
The effect of flow channelling on gable wall pressures
P.A. Blackmore (Watford, UK) 311
Effect of eaves detail on wind pressures over an industrial building
A.P. Robertson (Bedford, UK) 325
Wind loading on a portal frame agricultural building
E. Savory, N. Toy, S. Dalley and J. Trussler (Guildford, UK) 335
Structural response of a portal framed building under wind load
R.P. Hoxey (Bedford, UK) 347
A simplified approach to the determination of the influence of internal pressures on the dynamics of large span roofs
B.J. Vickery and P.N. Georgiou (London, Ont., Canada) 357
Numerical calculations of the temperature distribution in a smoke layer caused by a fire in a building
K.K. Bofah, H.J. Gerhardt, C. Kramer and V. Thiessen (Aachen, Germany) 371

Internal pressure of double composite exteriors
N. Chino, Y. Iwasa, Y. Mataki, T. Hagiwara and H. Sato (Tokyo, Japan) 381
Wind tunnel tests to determine the wind forces on roof blocks for existing buildings
H. Okada and M. Okabe (Ibaraki, Japan) 393
Fluctuating wind load on cladding elements and roof pavers
J. Wacker, R. Friedrich, E.J. Plate and U. Bergdolt (Karlsruhe, Germany) 405
Wind loads and flow regimes associated with sheltered lightweight greenhouses
B. Tahouri, N. Toy and J. Booker (Guildford, UK) 419
Characteristics of wind pressures on basic structures with curved surfaces and their response in turbulent flow
T. Ogawa (Tokyo, Japan), M. Nakayama (Kanagawa-ken, Japan), S. Murayama (Tokyo, Japan) and Y. Sasaki (Kanagawa-ken, Japan) 427
Further full-scale and model pressure measurements on a cantilever grandstand
N.G. Pitsis and L.W. Apperley (Sydney, NSW, Australia) 439
Wind tunnel investigations of roofs on fuel-tanks in connection with rain-water contamination
H. Sockel and I. Kronke (Vienna, Austria) 449
Wind tunnel test to design helidecks on the rooftops of high-rise buildings
M. Nakayama and Y. Uchiami (Kanagawa-ken, Japan), K. Watagami (Tokyo, Japan) and K. Ui (Kanagawa-ken, Japan) 459
A miniature cylindrical wind speed and direction sensor
D. Surry, A. McDougall and I. Murley (London, Ont., Canada) 469
